Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/813,627	Applicant(s) PAGE, MICHAEL	
	Examiner Daniel R. Sellers	Art Unit 2615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. **Claims 4-8** are objected to under 37 CFR 1.75(c) as being in improper form because the claims cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-8 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 1-3** are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Miyashita et al. (USPN 6,804,179) (hereinafter Miyashita).
4. Regarding **claim 1**, Miyashita teaches a digital audio system (Fig. 1) comprising:
means for reproducing digital audio signals from a signal source controlled by a control device (Col. 4, lines 25-40), characterized in that the control device is provided with a manually operable input arrangement which is movable in two directions such that movement in a first direction causes the reproduction of a portion of the signals to be omitted and movement in a second direction causes the reproduction of a portion of the signals to be repeated (Col. 8, line 66 - Col. 9, line 21).
5. Regarding **claim 2**, the further limitation of claim 1, see the preceding argument with respect to claim 1. Miyashita teaches forward and reverse directions to control the reproduction of the audio signals..

Art Unit: 2615

6. Regarding **claim 3**, the further limitation of claim 1 or 2, see the preceding argument with respect to claim 1. Miyashita teaches an omission of a periodic portion of the signal, wherein the size of the portion depends on the rate of movement (Col. 11, lines 22-48).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ogata et al. (USPN 6,509,848) teaches pressure sensitive trick play (Fig. 1-10);
and

Birmingham et al. (USPN 6,868,224) teaches trick play in an audio system (Col. 2, lines 7-35).
